The application is accompanied by an Environmental Statement which includes chapter 13 Cultural Heritage and Appendix 12 Historic Environment Desk Based Assessment. The information in these documents shows that the assessors have considered the impact of the proposed development on the settings of the above designated historic assets and apart from listed buildings 13865 Church of St Mellon and 13905 Pill du Farm concluded that there will be no impact. In regard to the Church of St Mellon they consider that there will be a slight adverse effect on the setting of the church and in the case of Pill du Farm a negligible adverse effect. In both cases the scale the effect will not be significant. We concur with these conclusions.

Finally, there may be undesignated historic assets that could be affected by the proposed development and, if you have not already done so, we would advise that you consult the Historic Environment Record held by the Glamorgan-Gwent Archaeological Trust (GGAT).

Yours sincerely,

National Policy

Applications for planning permission are considered in light of the Welsh Government's land use planning policy and guidance contained in Planning Policy Wales (PPW), Conservation Principles for the Sustainable Management of the Historic Environment in Wales, Technical Advice Notes and related guidance.

PPW ([Chapter 6 – The Historic Environment](#)) explains that it is important that the planning system looks to protect, conserve and enhance the significance of historic assets. This will include consideration of the setting of an historic asset which might extend beyond its curtilage. Any change that impacts on an historic asset or its setting should be managed in a sensitive and sustainable way.
