

Mor Hafren ERF: DNS Application 3236340

Wednesday 24 March 2021 10.00am - Hearing Session 2: Effects on sensitive human receptor locations (construction and operational phases)

Agenda and Inspector's Initial Questions/Discussion Points

1. Air quality and odours (including cumulative impacts)
 - i. Does the additional information provided by the applicant, including the updated Air Quality Assessment (Version 7), adequately respond to the points raised by the consultation responses concerned?
 - ii. What is NRW's position concerning the respective remits of the Environmental Permitting and planning regimes in considering impacts on human health arising from emissions to air from the development?
 - iii. Is NRW satisfied that the revised air quality modelling and results/conclusions now provided are sufficient and reliable for the purpose of considering whether planning permission should be granted?
2. Noise and vibration
 - i. Are the proposed CEMP provisions concerning piling methods sufficient to ensure that percussive piling is kept to a minimum and only occurs when ground conditions necessitate that this method is used?
 - ii. Should the condition regulating noise levels be amended to refer to residential properties only? Should Pinewood Studios also be included? Should the condition limit cumulative noise from plant or vehicles to a maximum rated level of 5dB below background noise level, or would a less stringent limit be acceptable? If the condition were imposed as currently proposed, what additional noise mitigation measures would be necessary to achieve compliance?
3. External Appearance and Visual Impact
 - i. Do the additional photomontages provided (Viewpoints 9, 11, 14 and 19) alter the respective stances of the parties concerning the landscape and visual impact of the development?
 - ii. External lighting – what is the source of the applicant's information that the proposed ERF 70m stack will not require aviation warning lights?
4. Traffic effects
 - i. What mechanism is proposed to ensure that all HGV movements would use the intended route, avoiding residential areas, to and from the site?

Hearing 2 Participants

In accordance with regulation 24, those invited to take part are:

Môr Hafren Bio Power Ltd	Marshfield Community Council
Cardiff Council	Residents Against the CF3 Incinerator
NRW	Wentlooge Community Council
